- Capacitor, Electron
- Claude, ChatGPT, Cursor, GitHub Copilot

Professional Experience

upWork (freelancer) - [Profile URL](#)

November 2024 - Present

Senior Front-end developer - Bonny Moon Beach Club [PREVIEW](#)

A website for Bonny Moon Beach Club – a premium beachside venue located in the Cayman Islands. The platform showcases the club's dining experience, events (DJ nights, live music, private gatherings), amenity packages, and booking functionality, serving an international audience. Built with Nuxt and powered by Directus CMS, the site features rich media content, newsletter integration, and a sophisticated event scheduling system.

Senior Front-end developer - Big Leap Health [PREVIEW](#)

A platform for locating nearby mental health clinics across the US, specializing in insurance-covered breakthrough treatments such as TMS therapy and Spravato (esketamine). Features advanced search and filtering by condition, insurance provider, and location, along with clinic profiles, virtual tours, patient testimonials, and an online symptom assessment flow. Powered by Prismic CMS.

Senior Front-end developer - Room Service [PREVIEW](#)

A website for Room Service by Ash – a premium full-suite FF&E (furnishing, decoration, and procurement) firm serving hospitality, commercial, and residential clients across the US. The platform showcases completed projects, outlines the 9-step service process, and includes contact and newsletter functionality. Powered by Storyblok CMS.

Senior Front-end developer - Ash Hotels [PREVIEW](#)

A website for Ash Hotels – a collection of cinematic boutique luxury hotels across the United States (Providence, Baltimore, New Orleans, Detroit, Richmond). The platform features hotel listings, city guides, a souvenir shop, gift cards, and newsletter subscription. Powered by Storyblok CMS.

Senior Front-end developer - Chase a Chance [PREVIEW](#)

A platform for collecting and trading baseball, Pokémon, and hockey cards, serving a global audience for a Canadian client. Implemented pixel-perfect UI based on Figma designs, integrated backend services, payment and notification systems, form validation, and custom animations. Built with Nuxt 4, TypeScript, TailwindCSS, and Pinia.

Senior Front-end developer - DemToes [PREVIEW](#)

A content marketplace platform connecting verified creators with buyers. Features include dual-role authentication (viewer/creator), a credit-based payment system, content unlocking, custom content requests, tipping system, and a creator verification flow. Integrated backend via provided REST API (Swagger). Built with Nuxt, TypeScript, TailwindCSS, and Pinia.

Hoverla soft

Sep 2021 - November 2024

Vue.js Front-end developer - [Video Presentation URL](#)

A large-scale project for companies that provide relocation and immigration services, consisting of two interconnected SaaS platforms. The company portal featured full white-label customization (logos, interface visuals), invoice management, messaging, task tracking, document exchange, and meeting scheduling. The client portal enabled users to pay invoices, upload documents, book meetings, and receive notifications – all within a fully branded experience. Built as a monorepo with Nuxt 3, TypeScript, TailwindCSS, Pinia, and Element Plus.

Responsibilities:

- Development and testing of new functionality
- SEO optimization setup (meta tags, Open Graph, structured data)
- Integrating with third-party APIs and services
- Assisting in the development and estimation of user stories
- Taking part in customer meetings and sprint demos
- Collaborating closely with designers and backend developers
- Refactoring and improving existing codebase
- Writing reusable components and maintaining UI consistency

Vue.js Front-end developer - project under NDA

A multi-platform product consisting of three interconnected applications. A marketing landing website presenting the product to potential clients, featuring engaging animations and SEO optimization. A mobile application allowing customers in restaurants and hotels to scan QR codes, browse menus, place orders, make reservations, and complete payments. An admin panel enabling businesses to generate QR codes, manage products, and configure platform settings. Built with Nuxt 2 and Vue 3.

Vue.js Front-end developer - over 10 projects under NDA

Worked on multiple short-term projects involving landing pages, admin dashboards, e-commerce features, CMS integrations, and responsive layouts. Tasks included building from scratch, fixing bugs, improving performance, implementing UI components, and collaborating with clients to meet tight deadlines.

Webtune

Oct 2020 - Aug 2021

Front-end developer

[Plit](#) • [Webtune](#) • [Indest](#) • [Ular](#) • [Optic](#) • [LivingRoom](#) (Mobile only)

Responsible for creating responsive, pixel-perfect layouts based on Figma designs for various marketing websites and landing pages, later integrated into WordPress by other developers. Worked on legacy projects requiring maintenance and updates, and implemented interactive elements such as maps and email templates. Built with HTML, SCSS, JavaScript, jQuery, and Gulp.
